WHEREAS, Trees Atlanta is a non-governmental, non-profit organization, which for 37 years has been committed to the care and replenishment of metro Atlanta's urban forest, which utilizes community volunteers to plant trees, thereby reducing the cost of its services while improving neighborhood involvement and sense of ownership in Dunwoody's urban forest; and

WHEREAS, Trees Atlanta has proposed a tree planting campaign in the Dunwoody. The City of Dunwoody Front Yard Tree Planting Program contemplates that Trees Atlanta will plant a maximum of 40 trees in neighborhoods within the City of Dunwoody between October 1, 2022 and March 31, 2023 (the "Program");

NOW, THEREFORE, FOR AND IN CONSIDERATION OF THE MUTUAL COVENANTS AND CONDITIONS herein contained, and other good and valuable consideration, the receipt and sufficiency of which is hereby severally acknowledged, the parties hereto do hereby agree as follows:

Scope of Work

1.1 Program

The goal for the Program is to plant shade trees in front yards to help increase overall tree canopy coverage in Dunwoody. Upon the signing of this agreement, Trees Atlanta and Dunwoody shall jointly and promptly undertake the marketing of the Front Yard Tree Program to City residents. Trees Atlanta will manage the processing of tree requests and coordinate with homeowners for the selection, placement and installation of up to two front yard trees through this program. Each tree planted as part of the Program shall be referred to singularly as a “New Tree” and collectively as “New Trees” hereinafter. Trees Atlanta staff shall be ultimately responsible for tree planting but may utilize supervised volunteer participation at its discretion. Trees Atlanta shall provide the services described in this section, section 2 and as may be described elsewhere in this Agreement (“Services”).

- 1.1.1 New Trees planted through this Program will be planted on private property located in Dunwoody. Trees Atlanta shall make certain that the New Trees planted on private property, upon maturation, will provide shade to the public right-of-way, and are immediately visible from the public right-of-way, and in no event shall they be planted more than 35 feet from the public right-of-way.
- 1.1.2 Trees Atlanta shall be responsible for securing a written or electronically recorded agreement with the private property owner(s) of record, whereby the property owner(s): (1) grants Trees Atlanta a right of entry to plant the New Tree(s); (2) acknowledges that s/he shall be the owner of the New Tree(s) and shall be responsible for maintaining it/them; and (3) agrees to hold Dunwoody and Trees Atlanta harmless for any liability attributable to the planting or presence of the New Trees on the private property.
- 1.1.3 All New Tree(s) shall be planted no later than April 15, 2023. However, should the Agreement not be approved and signed by the Program start date (October 1, 2022), Trees Atlanta will be granted additional planting days during the following planting season, during which it can fulfill the Agreement. The additional days shall equal the number of days lost between October 1, 2022 and the Agreement signing date. Planting season begins October 1 and ends March 31.
- 1.1.4 Trees Atlanta shall provide, on an as needed basis only, one pest control treatment, one fertilization treatment and one pruning for each New Tree planted. All references in this Agreement to maintaining New Trees shall mean that Trees Atlanta shall be obligated to take such action as is reasonably necessary to prune and provide pest control for the New Tree(s). Homeowners receiving a New Tree on their property shall sign an agreement obligating them to water the New Tree during the first two years and they shall notify Trees Atlanta if they notice any adverse conditions of the New Tree during the two-year replacement period as referenced in sections 1.1.6 and 1.18.

- 1.1.5 The procurement, planting, and maintenance services provided by Trees Atlanta for the New Trees shall include selection of the trees, project design, shipping, handling, labor, tools, equipment, and other associated expenses and/or activities associated with selection, planting and maintenance (only as described in 1.1.4 above) of the New Trees.
- 1.1.6 Trees Atlanta shall replace any New Tree planted as a part of the Program that dies during the two-year establishment period, except for trees that die due to vandalism, vehicular accidents, or acts of God. The replacement shall be accomplished at no expense to the City.
- 1.1.7 Where possible, replacement trees shall be the same species as the tree replaced, as long as the species is compatible with the planting location.
- 1.1.8 Trees Atlanta may replace any New Tree planted as part of this Agreement that dies due to vandalism, vehicular accidents, or acts of God, provided that any such replacement trees shall be counted toward the total number of New Trees to be planted pursuant to section 1.1 above, and not as a replacement pursuant to section 1.1.6 above. Replacement of trees under this section shall only be executed with prior City approval.
- 1.1.9 Pursuant to specifications of the Department of Community Development, Trees Atlanta shall keep a record of its plantings and care of all New Trees pursuant to section 1.1 above and shall provide this information to the City. The City shall have access to Trees Atlanta's tree planting records and tree inventory system upon request. Trees Atlanta shall utilize i-Tree to calculate details related to the environmental benefits of the New Trees at maturation upon request.

Terms of Providing Services

2.1 Standards for Selecting the Types of Trees to be Procured

When determining which New Tree(s) shall be planted in which locations, Trees Atlanta shall abide by the standards established by the International Society of Arboriculture in the "Trees and Shrub Transplanting Manual" including, but not limited to, the following: (1) only healthy trees with a well-developed root system and a well-formed top characteristic of the species shall be planted; (2) trees selected for planting shall be compatible with the specific site conditions and shall be overstory trees as shown in the Dunwoody Tree Protection Ordinance, or other closely similar species as agreed to between Trees Atlanta and the City of Dunwoody Arborist; (3) Trees Atlanta shall consider the ability of a species to regenerate a new root system and to become re-established; and (4) deciduous and evergreen trees shall be planted in October, November, December, January, February or March.

2.2 Quality Standards for New Trees to be Procured

- 2.2.1 New Tree(s) will be free from injury, pests, disease, or nutritional disorders at the time that they are procured and planted by Trees Atlanta.
- 2.2.2 New Tree(s) will be of good vigor at the time that they are procured and planted by Trees Atlanta. Though the determination of vigor is subjective and depends upon the species of the tree, in general, Trees Atlanta shall procure New Trees that meet the following criteria:
 - 2.2.2.1 The New Tree(s)' foliage should have a green or dark green color, large leaves and dense foliage in accordance with its species.
 - 2.2.2.2 The New Tree(s) should have new branches, and the shoot growth should be at least 1 foot per year. At least one half of the branches should arise from points on the lower two thirds of a trunk.
 - 2.2.2.3 Bark texture and appearance on the trunk and branches of the New Trees should be smooth or shiny, as appropriate to the species.
 - 2.2.2.4 New Tree(s) should be tapered, with an increase in diameter and a decrease in height. Trees Atlanta should not procure New Trees with reverse tapers or no taper.
 - 2.2.2.5 The roots of the young New Tree(s) should be light in color.
- 2.2.3 New Tree(s) will be free of root defects at the time that they are procured and planted by Trees Atlanta, including but not limited to: (a) kinked roots, in which taproots, major branch roots, or both are bent more than 90 degrees with less than 20 percent of the root system originating above the kink; or (b) circling or girdling roots that circle 80 percent or more of the root system by 360 degrees or more.
- 2.3 Procedures for Planting New Trees
 - 2.3.1 Trees Atlanta will ensure that, when New Tree(s) are planted, the standards established by the International Society of Arboriculture in the "Trees and Shrub Transplanting Manual", are followed, including, but not limited to, the following:
 - 2.3.1.1 Planting holes will be no less than one foot wider than the root ball or the container of the New Tree(s) being planted. Trees Atlanta will, if possible, create a planting hole three times the width of the root ball of the New Tree(s).
 - 2.3.1.2 New Trees will not be planted deeper than their placement in their former location or container.
 - 2.3.1.3 Spade compacted bottom and sides of the planting hole for the New Trees will be roughed or scarified to allow the penetration of the New Trees' developing roots.
 - 2.3.1.4 Planting holes of the New Trees will have good water drainage from the bottom.
 - 2.3.1.5 Once a New Tree is set in a planting hole, the planting hole will be backfilled with soil of good texture and structure. A backfill with native

soil alone is adequate.

2.3.1.6 Trees Atlanta will not add fertilizer to the backfill soil unless deemed necessary for the survival of the New Trees. If fertilizer must be added, a low rate will be used. Approximately 1.5 pounds of nitrogen per cubic yard of backfill will be utilized for bare root plants.

2.3.1.7 After placing the backfill soil in the planting hole, the soil will be slightly mounded to allow for settling; a ridge or dike around the perimeter of the hole will be formed to facilitate watering.

2.3.1.8 The backfill soil will be gently tamped, but not compacted, and soaked for settling.

2.4 Post-Planting Procedures for New Trees

2.4.1 The amount of pruning, if any, to be performed on each New Tree will be determined by the New Tree's response to planting. Other than removal of weak, broken, or diseased branches, no pruning will be performed on New Trees until after the first growing season.

2.4.2 Trees Atlanta will provide mulching for all New Trees and weed control and mitigation as may be required.

2.4.3 Trees Atlanta will perform a fertilizer application of the New Trees planted for the Program in the form of a two (2) year slow-release fertilizer, only as required for tree health.

2.4.4 Trees Atlanta will stake New Trees only in the following circumstances.

2.4.4.1 Protective staking may be used for New Trees that are able to stand without support to provide a barrier from potential harms such as foot traffic, mowers, and vehicles.

2.4.4.2 Anchor staking may be used to hold a root ball in place during the period of reestablishment for New Trees with otherwise adequate support.

2.4.5 When staking is permitted by the Department of Community Development or its designees, Trees Atlanta will determine the extent of staking by considering the New Tree's strength, form and condition at planting, expected wind conditions, the amount of vehicle or foot traffic, and the level of follow up maintenance.

2.4.5.1 Trees Atlanta will perform periodic follow up inspections on New Trees that are staked.

2.4.5.2 Trees Atlanta will remove the staking from a New Tree as soon as the New Tree is capable of providing its own anchorage and support.

2.5 Services Summary

In addition to the Services described in section 1.1 and elsewhere in this Agreement, the parties agree as follows:

- 2.5.1 The Front Yard Tree Program described in this Agreement will be available to all City residents with property appropriate for planting. Further, Trees Atlanta may, in consultation with the City, group the planting date(s) for specific tree requests based on planting location in order to improve the efficiency of planting operations.

- 2.5.3 City of Dunwoody Arborist and Trees Atlanta will identify a limited tree species list from which participating residents will be allowed to choose in consultation with Trees Atlanta.

Trees Atlanta will bill for all trees planted during the previous planting season and which are verified or approved by the City for billing. Trees Atlanta will provide the City with tree location data no later than April 15, 2023 and the City will aim to complete the audit or tree review by April 30, 2023 to allow for timely billing.
