Re: Network Refresh
Date: 1/23/2023

Action

Authorize the City Manager, Technology Director, or designee to move forward with the purchase of all hardware necessary to complete a full network refresh for City Systems using the CyberSecurity ARPA II budget for funding up to quoted \$521,708.42 (vendors include SHI and CDW-G using State and OMNIA contracts).

Summary

After full audit and review of the current City network, Interdev has put together a list of equipment that should be upgraded to complete a full network refresh.

Details

Due to new Cyber Security considerations and concerns (including the age of the current infrastructure), the Technology Department recommends a full network refresh to tighten our Cyber Security stance. The Technology Department reached out to our Network Managed Service Provider, Interdev, and requested a full audit, inventory, and upgrade plan. The budget request includes all hardware and equipment necessary to complete the network refresh plan.

Recommendation

Authorize the City Manager, Technology Director, or designee to move forward with the purchase of all hardware necessary to complete a full network refresh for City Systems using the CyberSecurity ARPA II budget for funding up to quoted \$521,708.42 (vendors include SHI and CDW-G using State and OMNIA contracts).
